**Dashboard Narrative**

Briefly describe the LEA's current strengths and progress in this area, and identify a focus area for improvement, including how the LEA will improve the engagement of underrepresented families.

**Burnt Ranch ESD** is a one-school district with approximately 75 students, four classroom teachers, four part-time specialists and two part-time administrators. This small size allows for much staff and parent communication and family involvement in both advisory groups and with decision making. About 60% of our students come from out of the district boundaries so by making the choice to attend our school they are often more willing to be involved in these activities. The staff will continue to encourage involvement from all groups, especially underrepresented ones, by reaching out to them and promoting their participation.

**School Climate (LCFF Priority 6)**

LEAs will provide a narrative summary of the local administration and analysis of a local climate survey that captures a valid measure of student perceptions of school safety.

1. **DATA**: Reflect on the key learnings from the survey results and share what the LEA learned.

2. **MEANING**: What do the disaggregated results (*if applicable*) of the survey and other data collection methods reveal about schools in the LEA, such as areas of strength or growth, challenges, and barriers?
3. **USE**: What revisions, decisions, or actions has, or will, the LEA implement in response to the results for continuous improvement purposes? Why? If you have already implemented actions, did you see the results you were seeking?

The results of a school-wide survey showed that over 90% of students feel safe at school. The majority of students surveyed felt that their concerns were heard and that there were adults on campus who cared about them. One challenge identified is how to effectively communicate school events and news with all parents and families. The school will be implementing more targeted approaches to reaching all students and their families.

**Access to a Broad Course of Study (LCFF Priority 7)**

LEAs provide a narrative summary of the extent to which all students have access to and are enrolled in a broad course of study by addressing, at a minimum, the following four prompts:

1. Briefly identify the locally selected measures or tools that the LEA is using to track the extent to which all students have access to, and are enrolled in, a broad course of study, based on grade spans, unduplicated student groups, and individuals with exceptional needs served.

   Burnt Ranch Elementary School District tracks progress in meeting Priority 7 standards by reviewing our course offerings and class schedules to access the extent in which all students have access to and are enrolled in a broad course of studies. We identify access and enrollment based upon grades, grade spans, unduplicated student groups, and students with exceptional needs.

2. Using the locally selected measures or tools, summarize the extent to which all students have access to, and are enrolled in, a broad course of study. The summary should identify any differences across school sites and student groups in access to, and enrollment in, a broad course of study, and may describe progress over time in the extent to which all students have access to, and are enrolled in, a broad course of study.

   For the 2020-21 school year, all students in grades TK-6 were enrolled in a broad course of studies. This included visual and performing arts and physical education instruction. Students were also able to access additional course offerings in the after-school program. In grades 7-8, students were enrolled in all courses of studies with the exception of world languages.

3. Given the results of the tool or locally selected measures, identify the barriers preventing the LEA from providing access to a broad course of study for all students.

   A barrier that exists for our district is our small size. We have limited staffing to provide electives and our relatively small number of students in these grades makes it difficult to offer a wide range of elective and course options. Another barrier for the district has been its inability to hire a foreign language instructor. We are located in a very remote and rural area and have not been able to retain a qualified teacher in this discipline. The district is exploring options for offering one or more world language in the future.

4. In response to the results of the tool or locally selected measures, what revisions, decisions, or new actions will the LEA implement, or has the LEA implemented, to ensure access to a broad course of study for all students? The district will continue to offer a broad course of study to all students by retaining qualified instructors along with encouraging current staff to expand their abilities to teach more and broader subjects. Daily and weekly schedules, along with the allocation of school minutes, will be continually refined and revised to maximize the courses that students can access.
